No Experience Needed: Whatever your background or experience, we want to speak with you!
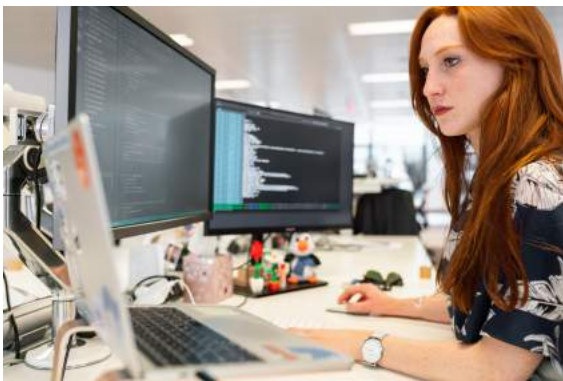

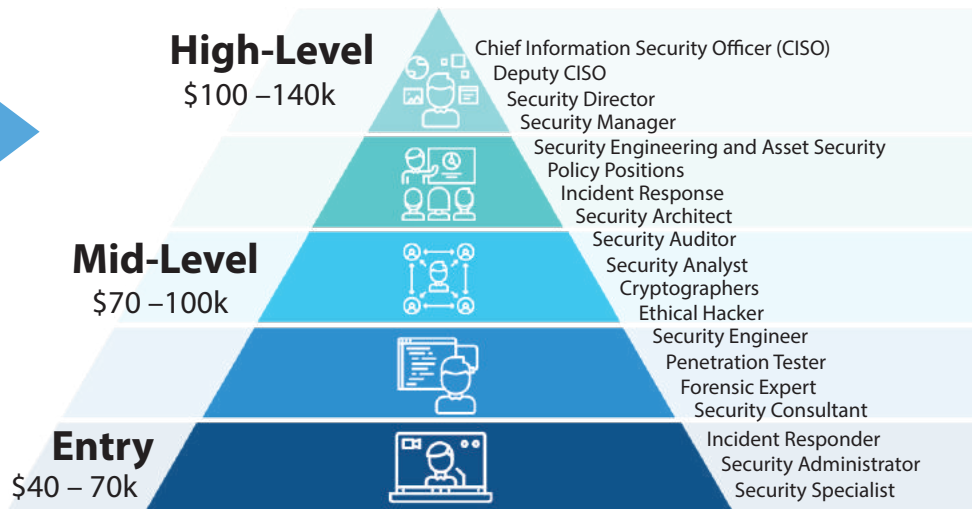

CYBERSECURITY CENTER FOR BUSINESS

To tackle the growing risk of cyber-crime in America's business ecosystem, the Cybersecurity Center for Business (CCB) offers cybersecurity education, training, and resources for businesses, educational institutions, and governments.

Our apprentices are trained by UW-Whitewater professors to apply the critical cyber skills and technical expertise businesses need to develop security policies, evaluate and prepare digital forensic evidence reports, and ultimately to enable organizations to mitigate the harmful effects of cyber crime.

There are multiple well paying cyber-career paths for apprentices, with a median annual salary of $76,000.

APPRENTICESHIP BENEFITS:

Interested in a challenging, in-demand career with upward mobility and growth? Cybersecurity is an emerging, vibrant field with over 5,200 jobs available in Wisconsin today.

There are endless opportunities! You could work within a government agency, educational institution, small business, or corporation. Cybersecurity jobs span across industries and sectors.

Our Apprenticeship Program will equip you with the knowledge, skills, and training to qualify for an entry-level cybersecurity job.

A Fresh Start: No experience necessary, free tuition, and program completion in as little as one year.

Hands-On Training: CCB's expert training teaches you information security theory and reinforces that theory with hands-on exercises to help you learn by doing.

CompTIA A+ Certification: Obtain the industry standard for establishing a career in Cybersecurity, trusted by employers around the world.

A Career Path: As the go-to person in endpoint management and technical support, our graduates will enjoy tremendous career growth potential in the fast-growing cybersecurity field.

HOW IT WORKS:

RECOVER · IDENTIFY · FRAMEWORK · PROTECT · DETECT · RESPOND

· Our apprentices complete 16 weeks of training with University of Wisconsin-Whitewater professors.

· Apprentices work a minimum of 600 hours, and must be paid a minimum of $12 per hour.

· Apprentices create a cybersecurity plan for businesses using the National Institute of Standards and Technology (NIST) framework.
