*Courses may be offered once a year or on a limited basis.

Department Website: www.uww.edu/coeps/departments/ci

Transfer students may have different general education requirements than those listed. Refer to your Advising Report for requirements specific to you.

General Advising Notes

Students must begin their Math and English sequences with the appropriate course. The English course a student starts with will be determined by their ACT English or SAT Verbal score. The Math course a student starts with will be determined by their UW System math placement test score.

All students must complete a minimum of 120 units in order to graduate. Requirements include:

- 1) University Requirements - four General Education Core courses and approved quantitative and technical reasoning, physical health and well-being, and general education elective courses.
- 2) All requirements for a major
- 3) All requirements for teacher licensure (if student is pursuing licensure), and
- 4) All requirements for a minor (if required for the student's degree).

College of Education and Professional Studies Program Notes

The **Business Education Bachelor of Science in Education** leads to licensure to teach courses in areas of the business curriculum, including accounting, personal finance, business law, general business, and keyboarding at the Wisconsin Department of Public Instruction *Early Childhood through Adolescence* developmental level (all ages in a public school).

This program does not require a minor. However, students may pursue any minor offered at UW-Whitewater if they wish and this may lengthen their time to graduation. Students who pursue a licensable minor should consult with the appropriate Licensure Program Coordinator to ensure that they meet any and all requirements for licensure in their minor subject area. If the student completes a licensable minor, they will be endorsed for licensure in their minor content area as well. Typically, a licensable minor will match the developmental level(s) of the major area.

Admission to Professional Education

The second point of admission for students seeking teacher licensure is called "Admission to Professional Education", which is required for students to take upper division education coursework in their educator preparation program. It is important to be aware of the requirements for Admission to Professional Education. Eligibility requirements and details about this process can be found at www.uww.edu/coeps/advising-admissions/admissions/prof-ed-admin. **The most critical items early on are the combined GPA and testing requirements.**

Students typically apply for Admission to Professional Education while taking or after completing the Foundations Block (and must have at least 40 completed credits in order to apply).

Students will be required to pass additional assessments prior to student teaching and licensure.
