

Kurzweil Installation Guide – PC

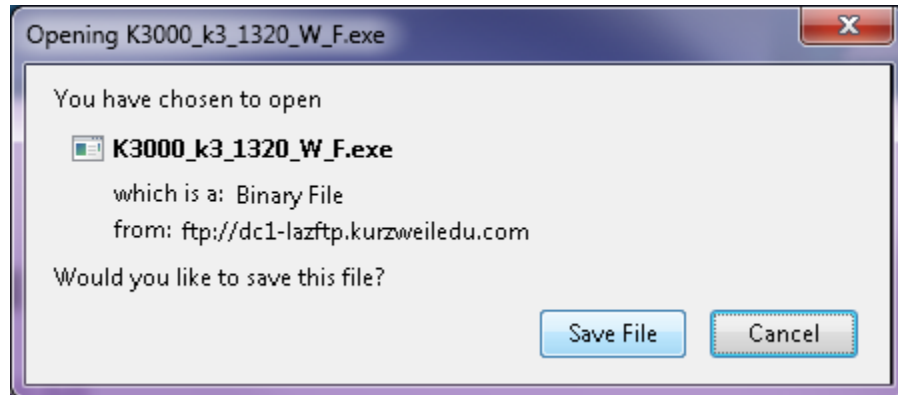

This is the installation guide for PC computers. If you have a MAC, please refer to the MAC installation guide. You will need to complete these steps after you have received your Kurzweil user name and password, which will be sent to your UW-Whitewater email.

1. Navigate to this website: www.kurzweiledu.com/k3win
 - a. Please use Firefox or Internet Explorer as the download speed will be much faster
2. Click the Kurzweil 3000 v13.20 (full) link. (Highlighted below)

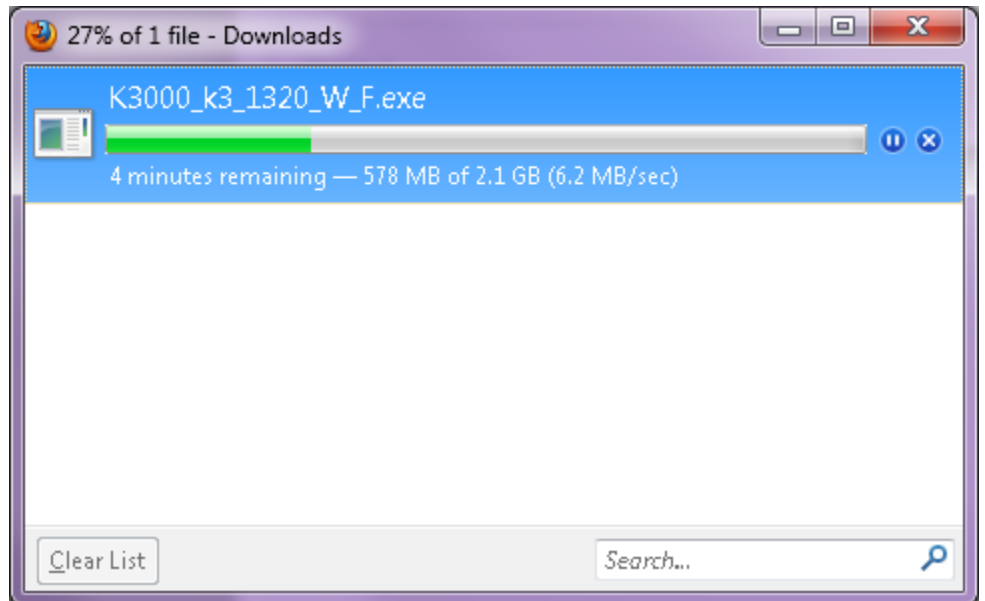

3. Save the Installation files to the computer.

a. For Firefox, click the Save File button when it prompts

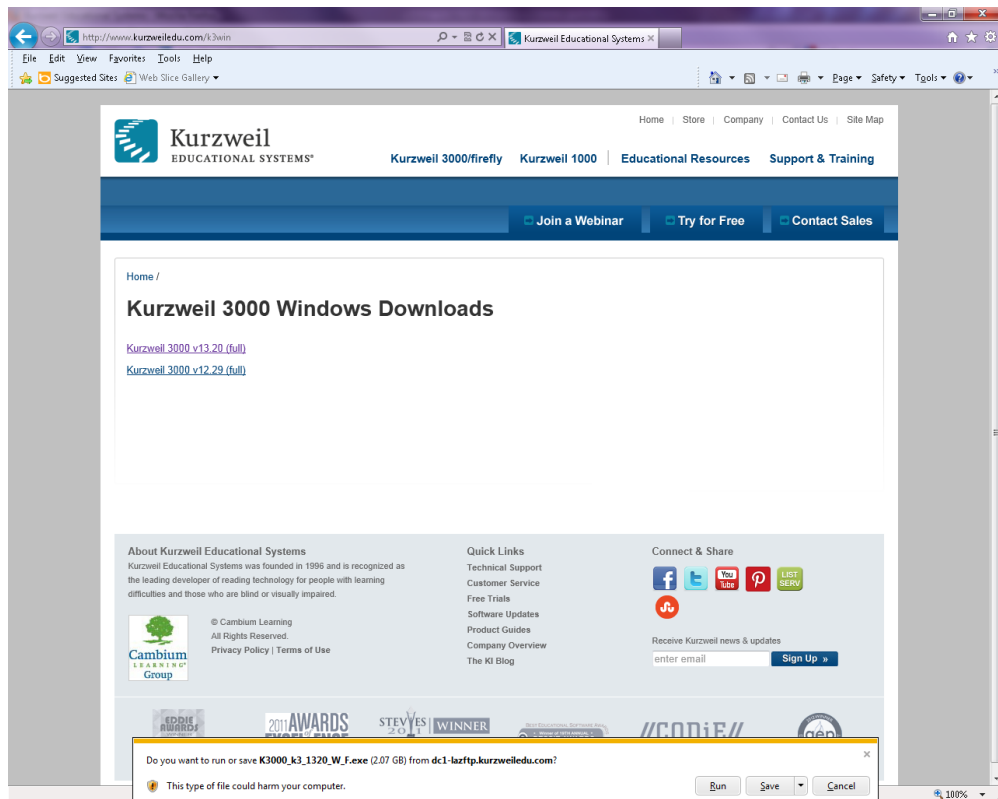

i. This will take some time to download; you will be able to track the progress in the pop up Window for Firefox.

1. Firefox Download window

- b. For Internet Explorer, click Save at the bottom of the screen.

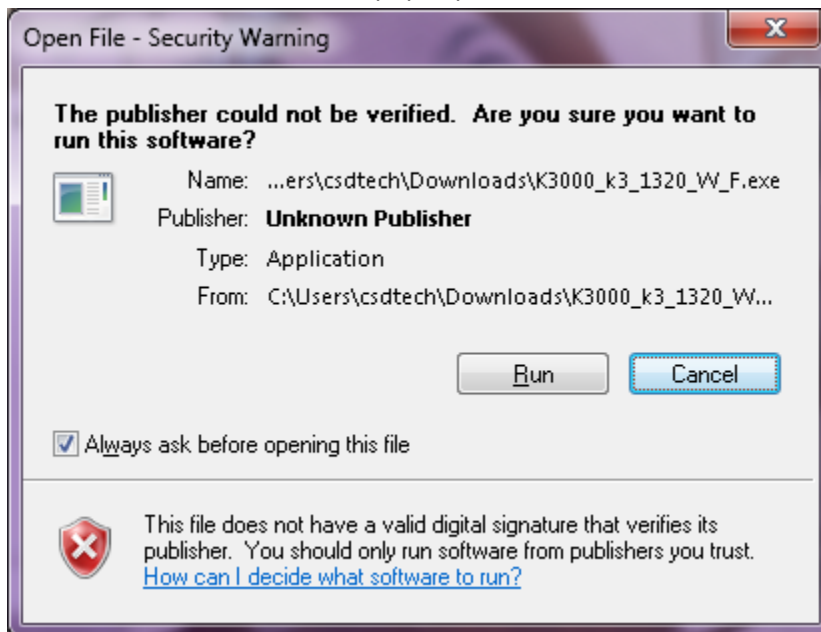

- i. This will take some time to download and you will be able to track the progress in the same bar that you click save in.

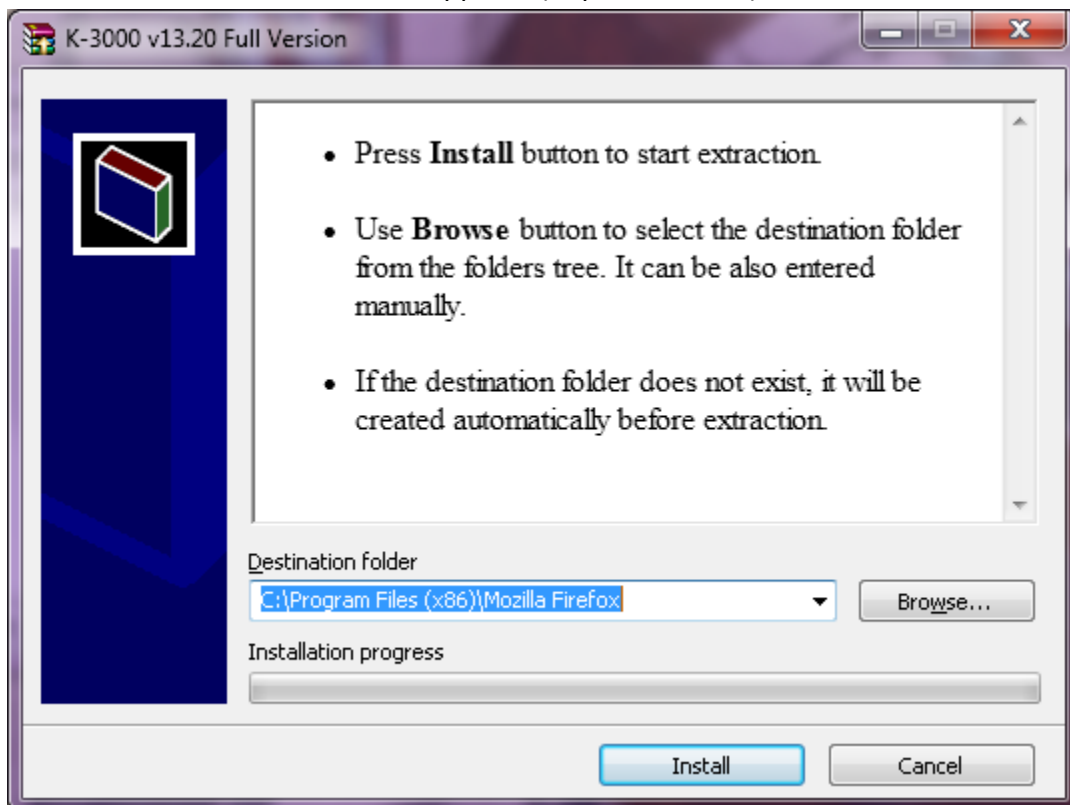

4. Once the download is complete, you will need to run the install file.

- If you downloaded the program in Internet Explorer, click run in the bar where you were able to track the progress.
- If you downloaded the program in Firefox, double click the file in the Download window.

5. Click Run on the Window that pops up.

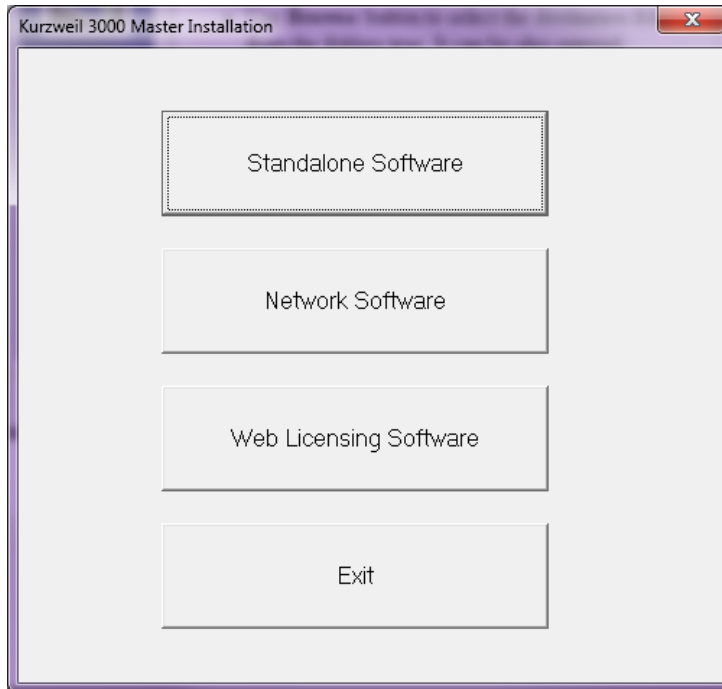

6. Click Install on the Window that appears (depicted below)

- a. This will take some time.

7. After the Extraction is done, a window will pop up, asking what kind of installation you will be performing. Click **Web Licensing Software**.

- a. A follow up window will pop up, click Install Web Licensing Software. This will begin the installation.

8. Click the next button until you reach the install button, then click install. All other information should previously be filled out correctly. Once the installation starts, it will take some time.
9. Once the installation is complete, click Finish and restart your computer. (You will be prompted to do this)
