The working group reviewed the needs and specific GPA of each individual program - or the GPA that they will intend/need to have based on their program's needs. Based on the data, and the needs each program has stated in their responses - if a global minimum is to be set at all - it should be based on the **minimum** of the GPAs represented in the spreadsheet (not the mode) - that would result in a minimum GPA of 2.75 to meet the needs of all persons and programs involved.

Otherwise, programs would be forced to adopt a GPA that does not work for their needs.

The recommendation is to not have a graduate school minimum required GPA to earn a certificate and to let each individual program set their own minimum GPAs based on the program needs.
