SCHOOL OF
GRADUATE STUDIES

UW-WHITEWATER

22 MASTERS PROGRAMS | 44 GRADUATE CERTIFICATES | 1 DOCTORAL DEGREE PROGRAM

Considering grad school? Whether it's the next step after undergrad or improving your standing in your field, you need a program that is not just theoretical and discussing what "might work." You need a program that is hands-on, giving you the skills to apply on the job from day one.

That is what you get at the School of Graduate Studies at the University of Wisconsin-Whitewater. An education you can use to grow your expertise, expand your career options, and increase your lifetime earning potential - all without breaking the bank.

Why Grad School at UW-Whitewater?
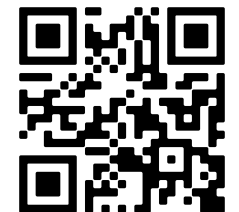

Study here…or there
Many of our programs feature in-person teaching designed to foster quality relationships between you and the instructors who are dedicated to your success. We also offer some programs online to allow you to study anytime from anywhere, but even those are backed by a brick-and-mortar university with a tradition of excellence.

Close relationships with faculty
Small class sizes means a low student-to-teacher ratio and more teacher/student interaction. You don't need a master's degree in business analytics to understand that. It also means you'll have a closer relationship with an instructor dedicated to your success and willing to work with you to make sure that happens.

Affordable
What good is the pay increase that often comes from a graduate degree if you only use it to pay off your student debt? The graduate school at UW-Whitewater is more affordable than most while maintaining the highest level of educational quality.
