FSSE-NSSE Combined Report August 2011

## **Interpreting the FSSE-NSSE Combined Report**

#### **Course-Based Survey Option**

The course-based option asks faculty members to respond to questions about student engagement based on a course taught during the current academic year. This option is valuable for institutions that want to know more about faculty practices and student engagement tied to individual courses taught on campus.

#### Sample

The FSSE-NSSE Combined Report shows responses from both students and faculty at your institution who completed NSSE and FSSE. This report only contains responses from faculty who responded to the survey based on their experiences teaching either a lower or upper division course. Data from faculty who responded based on another type of course or who did not report a course level are not included in this report. All student responses are the same as those included in the NSSE 2011 Frequency Distributions.

#### **Survey Items & Variable Names**

Results from the FSSE survey appear in the shaded box on the left, and items from the NSSE survey appear in the box on the right. In each box, the leftmost column contains survey items in the same wording that appears on the FSSE and NSSE instruments. The second column in each box contains the name of each variable for easy reference to your FSSE and NSSE data files and your 2011 Frequency Distributions reports.

#### **Faculty Responses** This column shows **FSSE-NSSE Combined Report 2011** the percentage of **NSSEville State University** student engagement faculty who responded at or above Faculty classroom practices and student responses: Student Responses **Faculty Responses** the indicated response category. To match Percentage of faculty who reported that more than half of students Distribution of student responses to how often they did the following at their institution during the from their courses do the following current school year the response Class Very Often Often Sometime categories provided 37% 32% 2% Frequently ask questions in class Asked questions in class or contributed on the FSSE to class discussions UD 44% 49% 32% 19% 1% instrument, the 22% 11% 60% 24% heading of this Come to class without completing assignments column varies 7% 15% 60% 18% SR throughout the report. #### **Student Responses**

Response categories are listed just as they appear on the NSSE instrument. The distribution of student responses match those in your NSSE 2011 Frequency Distributions.

#### Class Level

Frequency distributions are reported separately for faculty who reported teaching a course of mostly first-year and sophomore students (LD) or of mostly juniors and seniors (UD). Student responses are reported separately for first-year students (FY) and seniors (SR). Institution-reported class ranks are used for the student data.
